God helps the helpless

Compassionate story of a poor urology patient

Riyazat Khan 30 resident of Harda was suffering with a disease of narrow urethra, it causes severe pain while urination. Every time he felt pain when his urethra was filled with urine and there was no way to pass it. Local Doctor suggested him to insert plastic tube and exit urine. He was repeatedly doing so and it caused scratches on the walls of urethra and became thick and thus lost its flexibility. Riyazat Khan is a labour and his income is meager. Once he went to Jalgaon also to get himself examined. Surgeon has told him to arrange Rs. One Lakh for his surgery but he did not have money. Reversely he was afraid of the post operative consecutives of such risky surgery. It was a coincidence that a person of Harda met and suggested him to go for surgery at Free Urology camp being held at Sewa Sadan Eye Hospital. Because that person also had earlier underwent his urology surgery in a free camp of SSEH. He encouraged him to go for his surgical procedure. Riyazat Khan came here surgeons found that his case was very complicated. At last Dr. Pankaj Patel performed urethroplasty procedure by extracting soft skin from his mouth and transplanted it as a new urethra. It was a successful surgical procedure done on this patient. After fourth day of his surgical procedure, when this patient was contacted he was very happy and disclosed that he is not now suffering any pain in passing urine. One another patient standing in front of Riyazat Khan. Immediately reacted that God helps the helpless.

Saurabh Jatav 12 of Baroda village of Raisen district was also ailing with same disease. His urethra was affix with testicle. His father HariKishan also went to many govt. and pvt. Health organization. Where he was asked to arrange a bulk amount but he and his family was not capable to do so. Obstruction in passing urine causes severe pain to his child. Ultimately he also came to know about the free urology camp and brought his child where a successful urethroplasty procedure was done on this child. His soft skin also extracted from his mouth and perform similar procedure. Child is now happy and got rid of that old ailment.

Bablu 13 of Bareli was a patient of Hypospelia. His father Munnalal is a labour. He was also not passing urine from his normal route since his birth. On knowing about the Free Urology camp Munnalal came here with his ailing child, where a successful surgery procedure was done. This child was always ashamed with his physical bruise in the presence of his friends and social gatherings. Now he is happy and recovering very fast.

Another Hypospelia patient **Udit Patel** 8 years resident of Gairatganj also came with his father Indrajeet. He is a Driver. He also operated in the camp. Four years old **Hitesh Chaudhry** also underwent for Hypospelia surgery. His father is a driver and earning 7 Thousand per month. Pipariya based 12 years old **Abhishek** was suffering from a stone in his bladder. Size of stone was 29 mm thick so this child was suffering with severe pain all the time. Surgeons have successfully extracted stone from his bladder and now Abhishek is relieved from his old painful disease.
